

EC-12R/S RESTING AND STRESS TEST SYSTEM (BLUETOOTH)

- BUILT-IN EXPERT SYSTEM TO GIVE PRECISE DIAGNOSIS
- SMALL SIZE, COMPACT BUILD
- ALARM TO DETECT ELECTRODE FALLING OFF
- TREADMILL, ERGOMETER OR MASTER STEP BASED DIAGNOSTIC EXERCISE MEASUREMENT SYSTEM
- INTEGRATED RESTING AND STRESS TEST ECG SOFTWARE WITH DATABASE MANAGEMENT
- NO NEED TO CONNECT THE PATIENT TO THE PC WITH CABLES: BLUETOOTH PC CONNECTION

EC-12R/S

The EC-12R/S ECG has all the characteristics of the EC-12R device but it can also be used for making stress test examinations without monitoring blood pressure. In this case BP measurement is made with a conventional BP meter and the results are manually entered into the software. Connected to the PC, the device displays sampling and ECG curves with high precision, automatically loads controls and monitors HR, ST, ABP, MET, etc. parameters. The user-friendly analyzing software offers efficient and reliable measurements.

Monitoring patient with continuous recording

Besides conventional or short-term resting ECG records, you can also make records lasting several hours.

Ergometer and Treadmill database

Besides 17 ergometer and 18 treadmill built-in protocols, the software also contains Master-Step and Walking Test. All protocols have been tested.

ECG Filtering to improve signal quality

Using an effective digital filtering technology, there is practically no baseline movement. The smoothing filter removes muscle and network noise components from the signals without distorting QRS complexes.

Reducing the number of faulty readings by synchronizing BP measurements

Defining blood pressure by QRS gate method effectively reduces the number of faulty measurements. Due to the integration, there is no QRS synchronic "slip", so even in case of high heart frequency no such problem will occur.

Emergency stop when the patient feels discomfort or dizziness during continuous monitoring

In case a patient feels discomfort or dizziness during a stress test, monitoring can be extended up to 60 minutes with ST trends and blood pressure monitoring.

Rhythm view

All resting/continuous/stress test ECG examination will have a window below the normal 1-minute-long ECG display. This full view display shows a 5-minute-long ECG section and we can keep track of all arrhythmias in this section.
