

Restoring Cardiospy after false virus detection

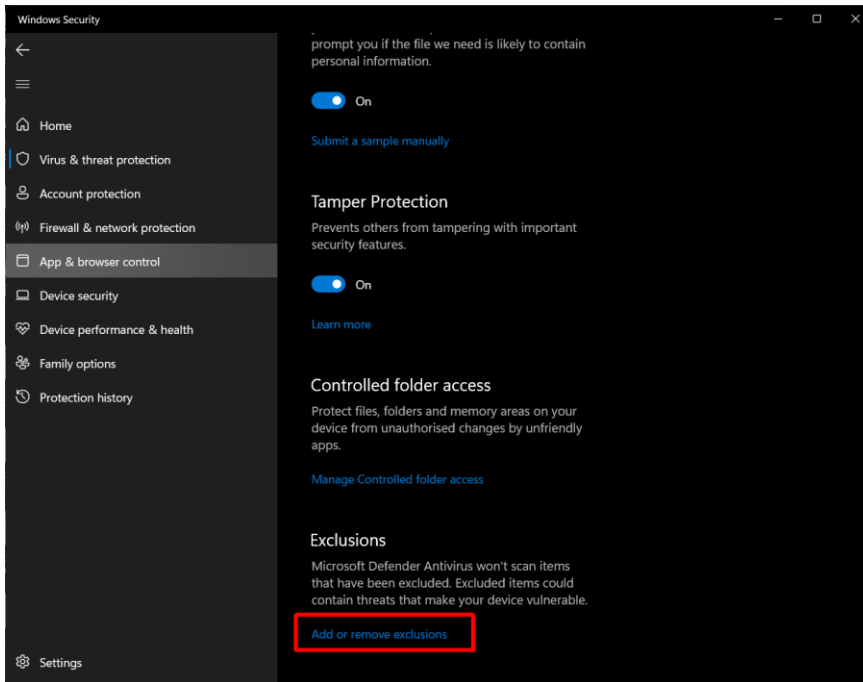

Step 1: Open Windows Defender and select Virus & threat protection.

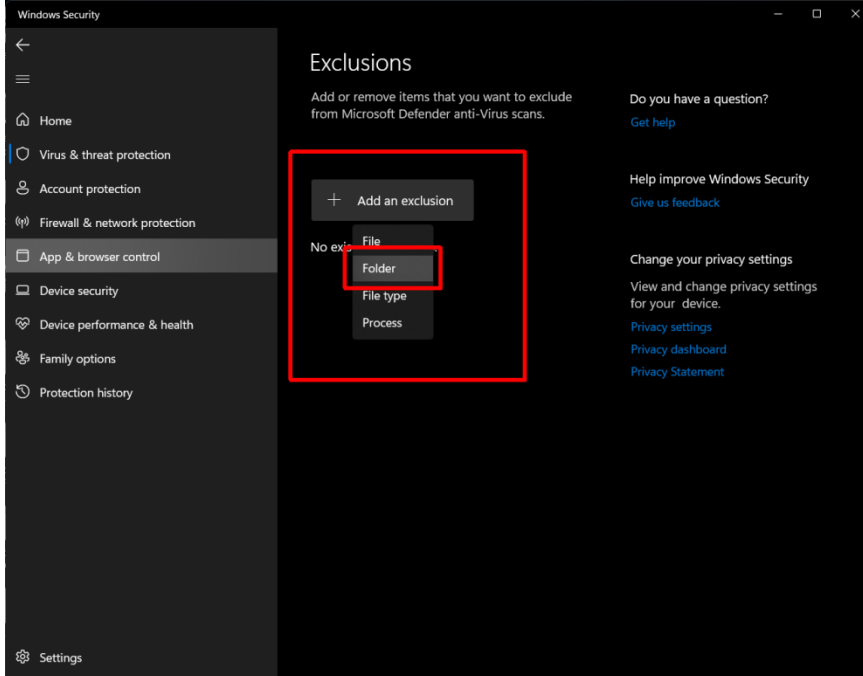

Step 2: Under Virus & threat protection settings select Manage settings

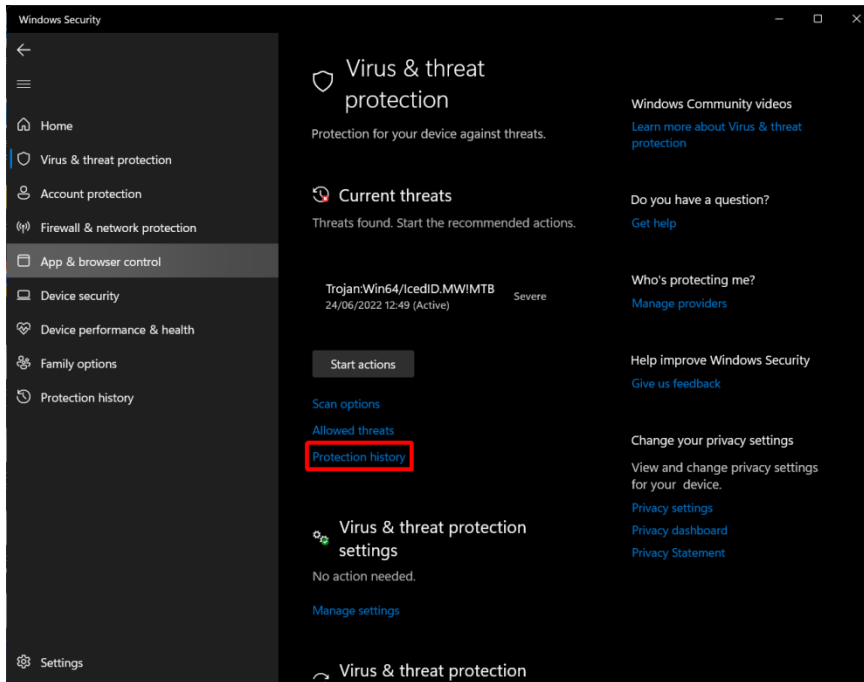

Step 3: Scroll down and select Add or remove exclusions.

Step 4: Add an exclusion to C:\Program Files\Labtech\Cardiospy folder

Step 5: Go back to Virus & threat protection settings and select Protection history.

Step 6: Select the quarantined threat and press restore.
